## **Effortlessly collect incident data and member information, without the need for complicated workflows or the hassle of spreadsheets.**

Organisations which work with security and crime data including public and private security companies, City Improvements Districts, safety, fire and emergency response organisations and Neighbourhood Watch organisations just to name a few, face the critical challenge of efficiently managing and reporting incident data, member information, and trends. Reporting Hub offers a robust and user-friendly solution to centralise and optimise these processes.

Our platform allows for rapid incident data collection, real-time geo-spatial analysis, and effortless member management, all designed with ease of use in mind.

# Why Choose Reporting Hub?

Reporting Hub is a strong choice for businesses looking to enhance their reporting and analytics capabilities.

- **Comprehensive Data Insights:** Consolidates data from various sources for a holistic view of your metrics and KPIs.
- **User-Friendly Interface:** Intuitive design easy for all users to navigate and generate reports.
- **Customisable Reporting:** Tailor reports to meet specific needs, to get the most relevant information.
- **Real-Time Data:** Access real-time data to make time-critical decisions.
- **Collaboration Features:** Easily share reports and insights for easy collaboration and communication.
- **Automated Reporting:** Automated reports save time and reduce manual effort.
- **Scalability:** Enhanced scalability for increasing data and user demands.
- **Security and Compliance:** Strong security to protect your data, compliant with relevant regulations.

# The Challenge

Security companies face the critical challenge of efficiently managing and reporting incident data, member information, and trends.

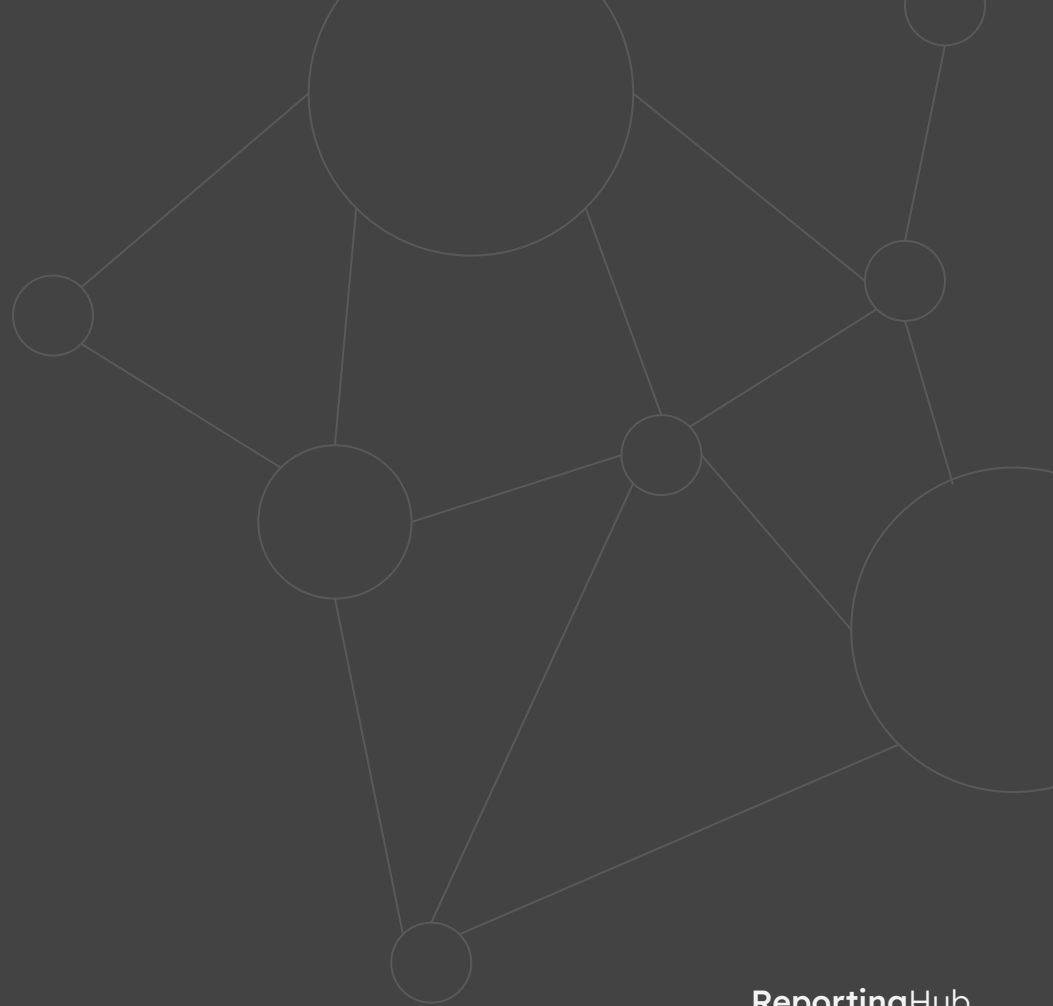

- Fragmented and inefficient incident data management across multiple channels.
- Delays and errors caused by manual processes like spreadsheets and outdated workflows.
- Difficulty in tracking trends and identifying high-risk areas without geospatial insights.
- Challenges in managing and updating member information in real-time.
- Lack of actionable, real-time analytics to support proactive security responses.
- Time-consuming and error-prone reporting processes, reducing overall efficiency.

# The Solution

Reporting Hub offers a low cost, seamless, easy to use, interface via which all incidents, regardless of reporting channel, can be logged by control room operators.

- Sophisticated, customisable data reporting, including heat mapping, to provide invaluable insights for tailoring crime-fighting resources.
- Comprehensive, predefined incident statistic reports can be generated regularly and upon request.
- Built by industry veterans who know what works and what doesn't.
- One simple system means more time for staff to deal with what matters.
- Plug and play: designed for simplicity, requiring minimal, if any, training and is ready right away.
- All incidents, regardless of reporting channel, logged by control room operators

# The Solution

ReportingHub

## Key Use Cases

- **Security Companies / CIDs/ NHWs:** Manage inbound incident information across multiple channels, track offenders, and measure risks by region.
- **Corporate Security Teams:** Use geospatial mapping to track trends, allocate resources, and provide comprehensive reports to stakeholders.
- **Field Security Agents:** Log incidents immediately via the mobile app, ensuring timely and accurate data collection.

# Current Clients

We service CIDs, Security Companies and NGOs.

Daily reports can be easily sent to clients, management, or any individuals you wish to include. This feature is fully configurable, allowing you to personalise reports with your branding.

Customised  
branding

The image shows a computer monitor displaying an email titled "AUTOMATED REPORT - CCP HOUT BAY Daily Report". The email header includes the sender "Reporting Hub" and the recipient "to CCP". The main content of the email is a dark-themed banner with the "RH" logo and the text "Reporting Hub Daily Report" and "What has been happening in Hout Bay". Below the banner, it says "Good morning CCPI" and "This is your report from 10/20/2024, 6:00:00 AM until 10/21/2024, 6:00:00 AM". At the bottom, there is a table with columns: Time, Reporter, Contact Method, Type, Area, and Ref.

Reporting Hub Daily Report  
What has been happening in Hout Bay

Good morning CCPI

This is your report from 10/20/2024, 6:00:00 AM until 10/21/2024, 6:00:00 AM

Time	Reporter	Contact Method	Type	Area	Ref
------	----------	----------------	------	------	-----

FEATURE HIGHLIGHT

# Features and Technology

## More Features

- **Historical Data Import:** Easily import past data to ensure continuity and comprehensive analysis.
- **Desktop Incident Capture:** Capture incidents with GEO-tagging for precise location tracking.
- **Service and Incident Management:** Efficiently manage both services and incidents in one user-friendly interface.
- **Integration with C3 Notifications:** Our development roadmap includes integration with the City's C3 notifications system for streamlined communication.
- **Proactive Task Scheduling:** Stay ahead with the automated scheduling of essential tasks.
- **Staff Management Tools:** Tailored facilities for managing security, urban, and social staff.
- **Custom Notification Alerts:** Configurable email and SMS alerts keep your team informed in real-time.
- **Comprehensive Reporting:** Generate scheduled reports across all CID departments and utilise crime and heat maps for visual insights.
- **Zone Configuration:** Easily configure the system into area and sector zones for localized management.
- **Documentation Support:** Attach supporting documents and media to incidents for thorough record-keeping.
- **Mobile** Capture incidents on-the-go with GEO-tagging for precise location tracking. (coming soon)
- **Repeat Offender Tracking:** Link offenders to specific crimes and their known associates, enhancing your investigative capabilities for a proactive approach to crime prevention.

## Centralised Incident Management

Log, manage, and query incident data from various sources in real-time eliminating the need for complex workflows and spreadsheets.

- **Log Incidents:** Capture and store incident details on the go.
- **Gather Stats & Track Trends:** Generate instant reports and analyse data trends.
- **Link Repeat Offenders:** Identify and track individuals involved in recurring incidents.

## Geospatial Data Mapping

Link incident data to specific geographic locations.

- **Spatial Querying:** Easily query incident data by location, enabling faster analysis.
- **High-Risk Identification:** Map and measure trends in specific regions, identifying hotspots for preventive action.

# Member Management

Efficiently managing security team members and clients is crucial for security companies.

- **New Member Capture:** Seamlessly add new member data into the system.
- **Updates & Maintenance:** Effortlessly manage and update existing member profiles in real-time.

# Cross-Platform Accessibility

- **Mobile App for Incident Reporting on the Go** Accessible online and via a cross-platform mobile app, security agents can report incidents in real-time from the field with no time is lost between incident occurrence and data entry.
- **User-Friendly Interface** Designed for simplicity and minimal training, teams can be up and running quickly without disruption.
- **Data Security & Privacy** Built with industry-standard encryption, ensuring all incident reports and member information remain secure, while still being easily accessible for authorised users.
